IWALEWA KOLAWOLE

MOBILE APPLICATION DEVELOPER | REACT NATIVE | SOFTWARE ENGINEER

08026908862 | kolawoleiwalewa@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Mid-level mobile and software developer specializing in React Native, Expo, TypeScript, and modern React. Experienced in owning cross-platform products from architecture and feature delivery through API integration, native hardware bridges, testing, VPS deployment, and App Store/Play Store release. Currently leads development across a multi-application engagement platform while independently delivering a two-sided travel marketplace for iOS and Android.

TECHNICAL SKILLS

Mobile: React Native, Expo, Expo Router, EAS Build/Update, NativeWind, Reanimated
Frontend: React, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, TanStack Query/Router
Backend & Data: Node.js, Express, Python, Django, REST APIs, PostgreSQL, MySQL, Drizzle ORM, JWT, WebSockets
Platforms & Integrations: Java native modules, Nexgo SmartPOS SDK, KinesteX, RevenueCat, Stripe, Paystack, Radar, Google Maps
Delivery: Git, Jest, Vitest, VPS deployment, Nginx, PM2, DigitalOcean, App Store Connect, Google Play Console

PROFESSIONAL EXPERIENCE

Platform Lead / Software Developer | Proximity Communications
Nov 2025 - Present

Full-time | Remote \ Web and Android

- Lead development across a five-application, multi-tenant engagement ecosystem serving brands, venues, consumers, students, promoters, and administrators.
- Build frontend and backend features with React, React Native, Node.js, Express, PostgreSQL, and TypeScript, maintaining shared contracts across web, mobile, and server applications.
- Delivered proximity-triggered campaigns, Radar geofencing, venue discovery, loyalty and rewards, promo-code redemption, push notifications, QR workflows, and operational analytics.
- Developed administration, vendor, consumer, and student/promoter workflows, including campus recycling deposits, leaderboards, fraud signals, audit trails, and CSV exports.

Mobile Application Developer | Afriplanora
Feb 2026 - Present

Contract | Remote | iOS and Android

- Built the complete React Native/Expo mobile application for a two-sided travel marketplace serving travellers and local service providers.
- Delivered discovery, itinerary planning, reservations, checkout, payments, and booking management across accommodations, restaurants, tours, events, and wellness services.
- Created vendor workflows for listings, pricing, schedules, availability, cancellation policies, team permissions, payouts, and QR-code guest check-in.
- Owned API integration, automated testing, multi-environment EAS releases, and App Store/Play Store deployment; reached 10+ Play Store downloads and 21 App Store first-time downloads during vendor onboarding.

Mobile Application Developer | RepMirror AI
Jul 2025 - Apr 2026

Contract | Remote | Web, iOS and Android

- Developed and released an AI-powered fitness application using React Native, Expo, and TypeScript, reaching 50+ Play Store downloads and 42 App Store first-time downloads.
- Integrated the KinesteX motion-tracking SDK for camera-based repetition counting, exercise-form analysis, and real-time coaching feedback.
- Built workout plans, session tracking, scheduling, analytics, challenges, leaderboards, push notifications, and RevenueCat subscription flows.
- Owned mobile release delivery, including store configuration, production builds, submissions, and over-the-air updates.

Mobile, Web & POS Developer | Santilotto
Nov 2025 - Jun 2026

Contract | Remote | Multi-platform lottery ecosystem \ Web & Android

- Independently developed customer mobile, responsive web, administration/agent portals, and Android POS applications for a connected lottery and gaming platform.
- Built lottery play and validation, peer betting, digital wallets, ticket management, virtual-game integration, results, rewards, analytics, and WebSocket live support.
- Created a custom Java-to-React Native bridge for the Nexgo SmartPOS SDK, enabling built-in thermal receipt printing, printer-status handling, and QR ticket verification.

- Automated native dependency installation, Gradle configuration, and Java package registration through an Expo config plugin, making the hardware integration reproducible across builds.

Frontend Developer | Flyttman **Nov 2024 - Sep 2025**

Contract | Remote | Sweden-based moving-services platform \ Web

- Developed customer, moving-company, and administrative workflows for quotations, bidding, bookings, disputes, and polling-based messaging using React and TypeScript.
- Integrated Stripe payments and resolved backend defects when payment implementation required cross-stack ownership.
- Set up and managed frontend and backend deployments on Loopia and DigitalOcean VPS environments using Nginx, PM2, and MySQL.

IT Support / Software Developer (NYSC) | BUA Group **Jul 2023 - Jul 2024**

On-site national service | Group IT

- Provided day-to-day IT support across business operations and independently designed, built, and deployed a MySQL-backed inventory management system for the Group IT Head.
- Centralized tracking of laptops, printers, and accessories across subsidiaries, covering procurement intake, employee assignment, transfers, returns, and outgoing assets.
- Implemented role-based access and deployed the application during the final week of the NYSC placement.

EARLIER CONTRACT PROJECTS

Mobile & Web Developer | Osun State Government - Spectrum **May 2024 - Aug 2024**

Contract | React Native and React

- Built a mobile tax-payment and compliance application and contributed to the supporting agent dashboard; the completed application was not published to app stores.

Mobile Application Developer | IFAD - Farmers Marketplace **Dec 2023 - Apr 2024**

Contract | Android release

- Took over, completed, and published a marketplace application connecting rural farmers with buyers and agricultural input dealers; surpassed 100 downloads before later removal from Google Play due to lack of updates.

Frontend Developer | King David Elites - Cream **Sep 2023 - May 2024**

Freelance | Approx. 20-person startup team

- Contributed to an AI-search-powered real estate and automobile platform, including React/Next.js frontend development and migration work.

EDUCATION

B.Sc. Mathematics **Apr 2018 - Jan 2023**

Federal University of Agriculture, Abeokuta
